THE SRTi AND SWi RANGE OF MACHINING CENTRES

Direct drive torque motors for the B and C axes provide, fast and responsive 5 axis motion. The 600mm diameter, 500Kg capacity rotary C axis is set in the table, meaning that full-capacity 3 axis machining can be achieved within the working envelope. Heavier and larger 5 axis components can also be handled when compared to the equivalent trunnion style machine.

Available with automated pallet loading at a very competitive price

Rising supply chain constraints lead to slower production

UK manufacturers continued to face rising constraints caused by supply chain issues during August, according to the latest IHS Markit/CIPS Purchasing Managers' Index (PMI).

Shortages of inputs and delivery delays disrupted production schedules, leading to slower output growth, and also resulted in marked increases in input prices. Companies nonetheless still achieved solid gains in output, new orders and employment.

The seasonally adjusted PMI fell to a five-month low of 60.3, a tick below July's 60.4 but above the long-run average of 51.9. The PMI has signalled an improvement in operating performance in each of the past 15 months.

Manufacturing output rose again in August, albeit to the weakest extent since February. Growth eased particularly

sharply at intermediate goods producers. Companies linked higher output to new order gains and the ongoing process of re-opening global economies

Incoming new business rose in August, reflecting increased inflows from both domestic and overseas markets. On the export front, manufacturers reported increased orders from clients in Europe, China, the US, Asia and South America.

The outlook for the UK manufacturing sector also remained bright in August. Almost 66% of companies indicated that they expect output to rise over the

coming year, compared to only 4% forecasting a decline. Confidence rose to a three-month high, reflecting expectations of continued economic revival, stronger global demand, investment plans and hopes that current supply issues would either lessen or even be fully resolved.

Robust confidence among manufacturers supported further job creation during August. Employment rose for the eighth month in a row and to one of the greatest extents in the survey history. Staffing levels were raised to increase capacity, meet rising demand requirements and start addressing backlogs of incomplete work. However, there were also reports from some manufacturers of both labour and skills shortages.

JCB to recruit 100 new welders to meet soaring demand

JCB is recruiting 100 new welders for its Staffordshire factories as demand for its products continues to soar.

The recruitment drive has just got underway for the permanent jobs at JCB's World Headquarters and its plants in Cheadle and Uttoxeter.

In September, JCB will also welcome an additional 15 new recruits on to its fabrication and welding apprenticeship.

In the past three years, almost 70 welding apprentices have passed their courses – and all gained permanent JCB jobs.

The news comes as demand for JCB machines reaches historic highs with most products now sold out until next year. It also comes in a year when JCB has recruited 1,350 new shop-floor employees

and handed permanent JCB contracts to 1,000 agency employees.

JCB chief operating officer Mark Turner said: "Over the past five years, the number of welders in the UK has shrunk which presents businesses with a big challenge at times of high demand.

"JCB has been working very hard over the past few years to tackle this shortage and attract new entrants to this highly skilled job with its apprenticeship and training programmes, which have been very successful.

"We are delighted to be building on that success with the creation of 100 permanent new welders' jobs. We offer some of the best conditions and pay rates in the region and with opportunities for nightshift work and overtime."

Call for future HGV plan

The Society of Motor Manufacturers and Traders (SMMT) has called on government to work with industry to develop a plan that facilitates the transition to zero emission HGVs, before it commits an end of sale date for conventionally fuelled trucks.

All of Europe's major truck manufacturers have agreed that new HGVs will be fossil fuel-free by 2040, and are investing billions in new powertrains to replace diesel, the most commonly used HGV fuel.

However, at present there is no clear technology that can provide full zero emission operations for all weights and uses of HGVs. The SMMT said in 2020, only 0.2% of HGVs were alternatively fuelled.

briefs

Valvetek auction to be held

An auction of engineering equipment, tooling and support assets from Halifax-based manufacturing firm Valvetek Machining UK Ltd that ceased trading in early August is attracting interest globally.

Walker Singleton, multi-disciplined chartered surveyors, has been appointed by Huddersfield-based business rescue and insolvency specialist Poppleton and Appleby, the proposed liquidators to disperse the assets.

There will be more than 500 lots at the online auction of equipment that will draw interest from medium and heavy engineering specialists.

The business had the machining capacity of up to 15 tons at its 20,000 square foot machine shop in West Yorkshire.

Now the contents are being sold on 16 September with a viewing day to be held the previous day.

Dan Hey, a director of Walker Singleton, said: "This large and well-known manufacturer specialised in the manufacture and machining of high-capacity valves, working across all heavy industrial sectors involved in fluid and gas transfer, including energy and water. It was particularly known for its boring and drilling capabilities.

"Already we have had interest from Egypt, India and the Americas, as well as manufacturers within the UK.

"The machines themselves will of interest to businesses within the industry, but there is also an eclectic mix of other assets.

"The catalogue of lots being offered is now on our website – walkersingleton.co.uk."

Valvetek Machining gave its workforce of 15 their redundancy notices on 9 August.

Investment in new Bruderer press drives business

One of the UK's leading manufacturers of precision springs, wire forms, pressings and assemblies has completed the relocation of its new press shop with the addition of a new, high-speed precision Bruderer press.

European Springs & Pressings Ltd, which supplies customers in the automotive, aerospace, building products, medical and nuclear sectors, has installed a BSTA 410-110B2 and high precision servo feeder to help it increase capacity and target more than £1m of new opportunities.

Fitted with the latest press and tool monitoring technology, the machine's expansive 1100 mm bed, production speeds of up to 1600 strokes per minute and fully adjustable stroke between 16 and 47mm, makes it an ideal addition for the Beckenham-based firm and means it can be used for pretty much every product it makes.

Continuing its policy of long-term investment in cutting-edge, innovative technologies, the acquisition is the final stage of a dynamic £700,000 project that has involved the construction of a

dedicated 6000 square foot press shop, which is set to deliver 20% efficiency gains and more streamlined production cells.

Stuart McSheehy, managing director of European Springs & Pressings, said: "Our relationship with Bruderer UK goes back more than 15 years and this will be our third new machine we've taken from Adrian Haller and his team.

"The Swiss stamping technology is the best in the world when it comes to precision, achieving tolerances and delivering flexibility, and this new BSTA 410-110B2 will be the real jewel in the crown of our new press shop."

He continued: "A long press bed

is ideal for satisfying the increasing demand from customers for longer press tools that accommodate more progressions and more complex shapes."

Due to the diverse nature of its markets, the company has enjoyed rapid growth since the easing of lockdown and is on course for a record £11m sales in 2021, which should create more than 10 jobs and the new press shop was critical to this expansion.

Adrian Haller, managing director at Bruderer UK, said the installation of the BSTA 410-110B2 is a "clear indication of the precision markets the company is going after" notably with the control technology.

Audi on the road to climate-neutral mobility

Production of Audi's final new combustion engine model will start in four years.

Beginning in 2026, the premium brand will only release models onto the market that are powered purely by electricity.

The manufacturer will phase out the production of internal combustion engines by 2033.

To become a leading provider of net-zero carbon mobility, Audi said it is also optimising every link in its value chain and committing itself to the expansion of renewable energy.

The company has outlined its vision of a climate-neutral factory

and showed how sustainability is implemented in the supply chain.

Audi wants to be a net-zero carbon emissions company by no later than 2050. By 2025, the company plans to offer more

than 20 fully electric, battery-driven cars. At the same time, Audi wants to reduce the ecological footprint of its fleet – specifically, by 30%, compared with 2015.

One central goal is to make production carbon neutral at all sites by 2025. This has been

achieved as an interim target at Audi Hungaria and Audi Brussels.

Audi said it is keeping all its processes in sight: the sourcing of raw materials and production itself, but also the utilisation phase and recycling or reuse at the end of a car's life cycle.

XYZ welcomes back Mike Corbett

After two years away from XYZ Machine Tools, former applications manager, Mike Corbett returned to the Burescombe, Devon-based machine tool company on 1 September, where he has taken on the role of production/technical manager.

The position became vacant after Mark Chappell, who has held the role since joining XYZ Machine Tools back in 2018, to return to live and work in Dubai in September.

"Mark's decision posed a few challenges as finding good people with the relevant experience, in a relatively short timescale is exceedingly challenging," said managing director Nigel Atherton.

"Fortunately, the move coincided with a chat with Mike and his 22 years' experience of our products and systems provided the perfect fit."

Mike is overseeing the build of machines prior to delivery along with working with XYZ Machine Tools' partners to ensure technical specifications are adhered to and to work to further develop the quality and performance of the full range of XYZ machines.

He said when the opportunity to return to XYZ, especially in this new position, it was a "simple and straightforward decision to make". Mike previously worked in an applications capacity at the firm.

Investment completes recovery

A Black Country manufacturer that puts the finish on boutique hotels, nuclear reactors and life-saving medical equipment has completed its latest investment drive.

Professional Polishing Services (PPS), which has increased its workforce by 25% since lockdown eased, has just installed a new dull polishing line to help it boost capacity and achieve its target of £2m sales by the end of 2022.

The company has spent over £250,000 on the latest purchase and this gives it the capability to apply a variety of finishes, such as dull polish and satin finish, onto stainless steel, aluminium, brass and copper sheet.

It comes just two years after it took ownership of new extraction equipment, pick and place systems and two Autopilot PHA bright polishers with automated handling, acquisitions that were only operational for six months before Covid-19 struck.

"Anyone in the world can touch up to 30 things we have polished every day - not bad for a small manufacturer based in West Bromwich is it?" explained Kirsty Davies-Chinnock, managing director of PPS. She added the firm is investing in the technology to meet escalating demand from many sectors, including automotive, construction and nuclear.

briefs

The ninth Tomorrow's Engineers Week will take place from 8-12 November 2021.

With the 2021 edition of the Week coinciding with the COP26 Climate Summit in Glasgow, the event will place an emphasis on demonstrating how engineering careers can contribute to tackling climate change and achieving net zero.

A packed calendar will see engineering institutions, employers and schools come together to deliver inspiring activity to give young people the opportunity to discuss solutions to the climate crisis.

The Week will feature a 'Schools COP' where students around the country will come together to discuss the vital importance of achieving net zero. The event will also explore how the engineers behind technological and scientific breakthroughs will be at the heart of the world's response to climate change in the coming years.

Details of how young people, schools, parents and employers can take part in the Week are available on www.teweek.org.uk or for any more information email hello@teweek.org.uk.

In the past three years alone, Tomorrow's Engineers Week has seen over 130,000 young people take part in interactive engineering activities.

Industrial Tooling Corporation (ITC) has employed two new apprentices.

The Tamworth-based cutting tool manufacturer has a long tradition of employing engineering apprentices and has welcomed the arrival of Danny Cockbill and Blaine Hughes as the 2021 cohort.

The new additions to the ITC team have already undergone academic engineering studies at a local college and their arrival at ITC will certainly set the two teenagers on a fulfilling career in engineering. During their four year apprenticeships, the two new apprentices will be exposed to a comprehensive practical and academic programme that will see the new starters learn their trade on state-of-the-art technology.

Prior to and throughout the pandemic, ITC has invested extensively in new CNC grinding machines and peripheral equipment. Danny and Blaine will both gain experience and academic skill sets that will set them on a path to fulfilling manufacturing careers.

ITC director Georgia Graves said: "Over the last nine years we have recruited more than 10 apprentices that have become valued members of our continually growing team. Developing the engineers of tomorrow is the lifeblood of any manufacturing business."

Great deals on new and used machine tools - every day...every week...every month!

Leadwell V-40 VMC with Fanuc control, 8,000RPM spindle & Nikken 4th axis head. YOM 2006

Spinner U5-1520 5-Axis Machining Centre with Heidenhain TNC630 control

12,000RPM, 54-tool ATC, high pressure TSC, swarf management, tool setter, 1.5m bed with integrated 4-/5-axis table. YOM 2012. Immaculate!

Dugard SS1263L VMC with Heidenhain i530 control 12,000RPM direct-drive spindle, thru coolant, 1,200kg sd table load. YOM 2015

Nakamura AS 200-MY with Fanuc control, driven tools, C-axis, Y-axis, tailstock, bar feed, parts catcher, swarf conveyor & tooling package. Immaculate! YOM 2015

CHOICE OF 2

Cincinnati Lamb CFV 800i with Heidenhain i530 control, 30-tool ATC, Nikken 4th axis, 12,000RPM spindle with through coolant. YOM 2008

Mazak VTC 300-C Travelling Column VMC with Mazatrol PC Fusion control, 12,000RPM spindle. YOM 2004

Hurco VMX60m with WinMax control, 10,000 RPM spindle, thru coolant, swarf conveyor. YOM 2011

Hardinge Talent 645-SV with Fanuc control, 6" chuck, 42mm spindle. Immaculate! YOM 2006

Hardinge Bridgeport XV 710 with Siemens 810D control & Shopmill, 8,000RPM BT40 spindle. Immaculate! YOM 2007

CHOICE OF 3

Hardinge Bridgeport XR 1000 with Heidenhain i530 control, 12,000RPM direct-drive spindle, thru coolant, 4th axis probing. YOM 2010

Hardinge Bridgeport XR 760 with Heidenhain i530 control, 12,000RPM direct-drive spindle, thru coolant, 4th axis probing. YOM 2008

Hardinge VMC 800 Sr II with Fanuc 0i control, 8,000RPM, 20-tool ATC. YOM 2003

Hwacheon Hi-Tech 200Ai with Fanuc control, 8" chuck, tailstock, parts catcher, removable tool probe. YOM 2005

Colchester T8M with Fanuc control, driven tools, C-axis, tailstock & tooling YOM 2008

Colchester T8 CNC Lathe with Fanuc control, 210mm dia chuck, 77.5mm bore, parts catcher & swarf conveyor. YOM 2008

Okamoto Grind-X ACC64CA-iQ CNC Surface Grinder. Only used as a demo machine and stored since! Just received. YOM 2010

YCM FX 350A 5-Axis Machining Centre with Heidenhain i530 control, 12,000RPM, thru coolant, 60-tool ATC, glass scales & probing. YOM 2012

Quaser MF500-C 5-Axis Trunnion Style VMC with Siemens 828D control, 12,000 RPM, 30 tools. Immaculate! YOM 2012

Haas VF2 with 21-tool ATC, 10,000RPM spindle, swarf auger. Mint! YOM 2008

Haas VF4, 1,270mm x 508mm x 635mm movements, 8,100RPM, swarf auger. YOM 2007

Haas TL2 with quick change tool post and holders, 8" 3-jaw chuck, coolant. YOM 2014. As new!

Haas SL10 with parts catcher and swarf auger, fitted with Haas Servo 300 bar feed. YOM 2004

CHOICE OF 2

XYZ VMC 710 with Siemens 828D control, 24-tool side-mount ATC, 8,000RPM. 2010 & 2014

XYZ 2 OP portable VMC with ProtoTrak control, 8-tool ATC & tooling. YOM 2016

XYZ SLX 555 x 1m with 12" chuck, 104mm spindle bore. Immaculate! YOM 2012

CHOICE OF 2

XYZ SLX 1630 with 3- & 4-jaw chucks, travelling & fixed steadies. Immaculate! YOM 2012

XYZ SLX 425 x 1250 with ProtoTrak SLX control, 3- & 4-jaw chucks, quick change tool post. YOM 2015

XYZ SMX 2000-2 with R8 spindle, power draw bar, DXF file reader and table guards. YOM 2016

CHOICE OF 2

XYZ SMX 2500 with ProtoTrak SMX control, vari-speed R8 taper spindle, electronic handwheels, power drawbar. Immaculate! YOM 2015

XYZ SMX 3000-3 with 3-Axis ProtoTrak SMX control, vari-speed head, ISO 40 spindle. YOM 2008

CHOICE OF 2

XYZ SMX 3500 with ProtoTrak SMX control, electronic handwheels, Traking & power drawbar. YOM 2013

XYZ SMX 4000 with ProtoTrak SMX control, programmable spindle speeds, Traking, electronic handwheels & power. YOM 2012

XYZ SLX 425 X 1.25 Lathe

2018, Prototrak SLX Control, Swing 480mm, Centres 1,250mm, Traking, Constant Surface Speed, Octp, Spindle Bore 80mm, Power 7.5kw 10Hp, Tailstock.

XYZ Proturm SLX1630

2018, 3 Jaw Chuck, QCTP and holders, swing over bed 400mm, over cross slide 218mm, between centres 760mm, spindle bore 54mm.

XYZ EDGE 1500

2003, Prototrak EDGE 2 Axis Control with 3 axes dro, quillstar, R8 taper, table 1066 x 228mm, travel X 660, Y 330mm.

XYZ SMX3 2000 CNC Turret Mill

2006, Prototrak SMX3 Control, 3-axis, R8 taper, trav 750 x 380 x 400mm, Advanced Features, Network, Traking.

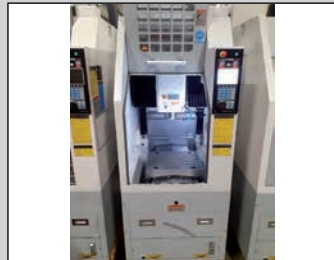

XYZ VM3500 Bed Mill

Year TBA s/n 10379, Prototrak VM CNC control, table 1372mm x 355mm, Trav 762 x 508 x 58mm, power drawbar 40int, Options - TBC.

XYZ SMX 5000 CNC Bed Mill

2016, 40 int power drawbar, prog spindle speeds 40-5000rpm, travel 1524 x 596 x 540mm, 5.75kw.

XYZ ProtoTRAK 2-0P

2017, Prototrak 3 axis CNC Control, Trav 355 x 305 x 455mm, 6000rpm, BT30, 8atc, 3hp, 3-phase power. Footprint 775 x 1,380 x 2,520mm tall.

Mazak Variaxis 730-5X II

2008, Mazak Matrix Control, 40 Station ATC, High pressure Coolant, Coolant through the spindle, 10,000RPM, Renishaw Probe interface, Swarf Management.

Hyundai Kia VX650/50

2008, Fanuc 21i-MB, Travels X-1,400mm, Y-650 Z-635mm, Table 1,600 x 650mm, BT50 taper spindle, 6,000RPM, 24 ATC.

Supermax YCM158B

2003, Heidenhain TNC426, table 1700 x 860mm, trav 1500 x 860 x 750mm, bt50, 6,000rpm, 24atc, 15/18.5kw.

Mazak VTC800/30SR

2014, Mazatrol Matrix 2 Control, table 3500 x 820mm, trav 3000 x 800 x 720mm, Spindle head rotation +/- 110 degrees, 48atc, CAT40.

Dugard Eagle 100 CNC Lathe

(Model FCL-140), 2007, Siemens802D sl control, Cutting dia 210mm, length 290mm, bar cap 45mm, 6,000rpm, 10 station turret, tailstock, Swarf conveyor.

Colchester Tornado A50

2001, Fanuc 21iTB, collet chuck, 12 station VDI 30 turret, turn dia x length 170 x 350mm, bar cap 42mm, No swarf conveyor, No tailstock.

Nakamura WT150MMY

2003, Fanuc 18iT, opposed spindles, Twin turrets, 2 x 12 stn, driven tooling, Y-axis on upper turret, Swing over bed 190mm, Max turn 400mm, Bar size 51mm dia.

Joemars Model JM325DZ

Small Hole Electrical Discharge Machine. 2005 Carmar SW 5000 Fuzzy Control, Table Size 460mm x 210mm, X & Y Travel 330mm x 200mm, Ram Servo Travel 345mm, Max Electrode Length 400mm, Electrode Size 0.3mm - 3mm.

Grind-Rite Centreless Grinder

Model 60-000, 2004, CW 2 axis Acu-rite DRO, Optidress, Coolant.

FOR SALE BY ONLINE AUCTION

On behalf of the Administrators of GBM - Manufacturing Limited T/A Garrandale Manufacturing and Other Parties - Late model CNC and Conventional Fabrication Equipment

Lots include:

- 2019 LVD Phoenix FL3015 IPG 6kw Fibre CNC Laser Cutter, with Sinumerik 840 Control, DCE Extraction, Thermotec Chiller PLUS LVD Compact 3015 Sheet Storage and Retrieval Tower
- 2019 LVD PPEB 320/30 320 tonne x 3 metre Pressbrake together with Tooling
- 4 x 2019 HPC ASK 40T Packaged Screw Compressors t/w Air Receivers, Oil Separators
- 2 x Kemper Weldifill Compact Extraction Cabinet t/w Welders Extraction Benches
- 3 X 2019 Kemper Maxifill Mobile Fume Extractors
- Large Selection of 2019 Lorch 300, 350, S3 and Speedplus XT Mig Welders
- Street 10t and 5t single girder overhead travelling cranes
- 2 x Street Semi Overhead Travelling Cranes
- 2019 Guyson Shot Blast Cabinet
- 2017 Comau/Hemming type C5G RCS3-E Robot Cell (Located in Coventry)
- Boko Milling machine
- Bowmar 410.280 DGH and BS-250 HAS Horizontal Bandsaws
- 2008 Gullco KBM-18-100C Plate Beveller, Colchester Triumph 2000 Lathe, J&S 540 Surface Grinder, Ajax Turret Miller, Pollard Pillar Drill, belt finisher, bench grinders, Cebora plasma cutter, various welding benches, racking, welding screens, digital scales, various power tools, pallet trucks

- **Location:** GBM-Manufacturing Limited T/A Garrandale Manufacturing, 8 Northledge Business Park, Alfreton Road, Derby, DE21 4BN
- **Viewing days:** 10am – 4pm Wednesday 29 September and Monday 4 October 2021
- **Online auction opens:** 10am Monday 4 October 2021
- **Lots start to close from:** 10am Wednesday 6 October 2021

For more information and to bid online please visit www.mgrappraisals.com or call +44(0)121 2002206

Fabrication and Machinery Online Auction

Bidding Closes: Friday 1st October 2021 at 12 Noon

On Behalf of: Montgomery Services Ltd.

Sale to include: Strippit 100XP/20 and 1000R CNC Turret Presses, Guifil P25/60 and A Colly 5025 Pressbrakes, Bridgeport Vertical Mill, Colchester Lathe, Plasma Cutting Table, Toyota Forklift and General Workshop Equipment etc.

Viewing: By appointment on Thursday 30th September 2021, 10am - 4pm

Location: Unit 8, Chelworth Industrial Estate, Cricklade, Swindon, SN6 6HE

Snow OS25/6 Horizontal Spindle Surface Grinder

Snow OS25/6 Horizontal Spindle Surface Grinder
Magnetic Chuck 600 x 2500mm
Max Height Under Wheel 600mm
Power Rise & Fall
Coolant
Darent Filtration
Serial Number 8462

Herkules Cylindrical/Roll Grinding Machine WS 350 x 3200mm

Max. grinding diameter: 36" (915mm)
Minimum grinding diameter: 10mm (0.4")
Max. grinding length: 3200mm (128")
Grinding wheel: 750mm x 80mm x 305mm
Wheel head speeds variable 40 – 1500rpm
Work head speed 6 – 45rpm
Max workpiece weight 3,000kg
Various steadies

LUMSDEN 96ML Rotary Table Surface Grinder

LUMSDEN 96ML Rotary Table Surface Grinder
Segmental wheel diameter 54" (1371 mm)
Segments per set 18
Table diameter & grinding capacity 100" (2540 mm)
Magnetic table dia. 100" (2540 mm)
Max. height of wheel to table 30 1/4" (768 mm)
Min. height of wheel to table 6 1/4" (159 mm)
Max. height of wheel to magnetic table 24" (610 mm)

Gockel ELT 50 Knife Grinder x 4000mm

Grinding Width 225mm
Grinding Length 4000mm
Grinding Height 120/140mm
Grinding Motor 5 ~ 15hp, 1750-rpm
Grinding Wheel Max. 250mm
Carriage Drive 0.02 ~ 30 m/min
Table Type Electromagnetic
Table Width 155 / 200mm

Behringher LPS40-4-A Fully Automatic Block Saw

Behringher LPS40-4-A Fully Automatic Block Saw
Year 2003
4000mm x 2000mm x 350mm Blocks
Condition: Used
Manufacturer: Behringher
Model: LPS 40A

Amada H1300 Horizontal Bandsaw (1982)

Capacity 1300 x 1300mm
Power 230 V – 50/60 hz / 400 v – 50hz / 460 v
60hz. Blade drive 11 kw
Hydraulic drive 3.7 kw
Coolant drive 0.4 kw
Wire brush drive 0.4 kw
Blade size 11380mm x thickness 1.6 x width 65 mm

XYZ 1010 Vertical Machining Centre (2004)

Siemens 810D Shopmill Control,
X Travel = 1010mm,
Y Travel = 500mm,
Z Travel = 520mm,
450mm x 1200mm Table Size

Verson AI 300ton Horizontal Press

300ton Capacity
24" Stroke
72" Bed
Machine Data:
Model AI
Serial Number RA 1196

Webster & Bennett S Type 48" CNC Vertical Borer (Rebuilt 2008)

Table Size 1250mm
Swing 1750mm
Max workpiece dia. 1750mm
Max height under elevating rail 1600mm
Cross rail adjustment 1000mm
Max height under pentagon turret 1930mm
Max travel of Turret slide 950mm
Main motor 57kw

Asquith Butler HHE 4000S CNC Bed Mill x 8000mm (1997)

Length of bed 8000mm
Width of bed 1030mm
X axis travel 6200mm
Y axis travel 1620mm
Z axis travel 1050mm
Auto Indexing Head
Toolchanger

Webster & Bennett 72" EV Series Vertical Borer (1975)

Serial No. 6669-3
Table size 72" (1830mm)
Max swing 84" (2134mm)
Max height under elevating rail 48" (1220mm)
Vertical travel of turret slide 38" (965mm)
Table speeds 5.2-117rpm
Main drive motor 40hp
Manual Clamping to Elevating Rail

Webster & Bennett 48" V Series Vertical Borer (1975)

Serial No. 6707-1
New 1975
Table size 58" (1473mm)
Max swing 59" (1500mm)
Max height under rail 23.5" (600mm)
Vertical travel of turret slide 24" (610mm)
Table speeds 4.5-100rpm
Feeds 0.1mm to 5.0mm per rev

MACHINING CENTRES

2011 **Doosan MX2100ST** with bottom turret and tooling. EX MEDICAL COMPANY

XYZ 1020 VMC Vertical Machining Centre (2012). Traverses X/Y/Z: 1,020 x 520 x 575mm, table 1,120 x 500mm, 20hp spindle motor, Siemens 828 with Shopmill control, 8,000rpm spindle, coolant, 24-station ATC, BT40 taper, 15kW, low-volt light

MIKRON VCE 800W Pro (2005). 14k spindle, ISO 40, 24-position T/C, scales in all axes, Heidenhain 530 control.

MAZAK V655/60 with 4th axis

2010 **MIKRON HPM 800U**. Spindle taper HSK63, max workpiece size 800kg, number of axes controlled 5/5 simultaneous, spindle speed 20,000rpm, table size 500 x 631mm, 165 ATC, traverses XYZ: 800 x 800 x 550mm, machine weight 15,500kg, through-spindle coolant, swarf conveyor, touch probe

DMG DMU50 Ecoline (2014). 12k spindle, ISO 40, 30-tool T/C, 3+2 machining with Siemens 840D control

2008 **MAZAK Integrex 800V/5 II E Tower**. B-axis movement head: +120/-30°, Mazak Matrix control, max machining dia 730mm, maximum workpiece weight 680kg, rapid feedrates 50m/min, spindle speed 12,000rpm (milling), 80 ATC, traverses XYZ: 1,100/800/900mm, through-spindle coolant, tool setter, swarf conveyor, twin-pallet, full 5-axis machine, the table spins just like a lathe to machine large components in one set-up

2011 **DMG GILDEMEISTER Sprint 42** Linear High Performance Bar Machine. **Arriving soon**

Hardinge RS51MSY CNC Lathe, with C & Y axis, sub-spindle and milling (2007)

2012 **DMG GILDEMEISTER Twin 42**. **Arriving soon**

CNC LATHES
